PRO|GEN®

PROBE™

Scan. Analyze. Detect.

Cutting-edge hair and skin assessment tools.

Small devices.

Big Technology.

With state-of-the-art technology and a focus on unparalleled functionality, Pro|Gen Probe is proud to offer industry professionals the most accurate and user-friendly skin, hair scalp and hair cuticle analysis machine available on the market today. Our cameras have gained the attention of beauty and health experts across the globe for its unparalleled analysis capabilities.

By accurately assessing your client's personal skin and hair health needs, our devices help your salon and day spa staff members increase: sales, services, profits and repeat business; helping your business to become the local skin and hair authority.

THE BUSINESS OF **BEAUTY**

• Increase your profits

Pro|Gen Probe salon tools provide the data and confidence your staff needs to close more sales and move product inventory off your shelves with unprecedented speed. In addition, offering our hair and skin consultations as a paid service can provide a new stream of revenue.
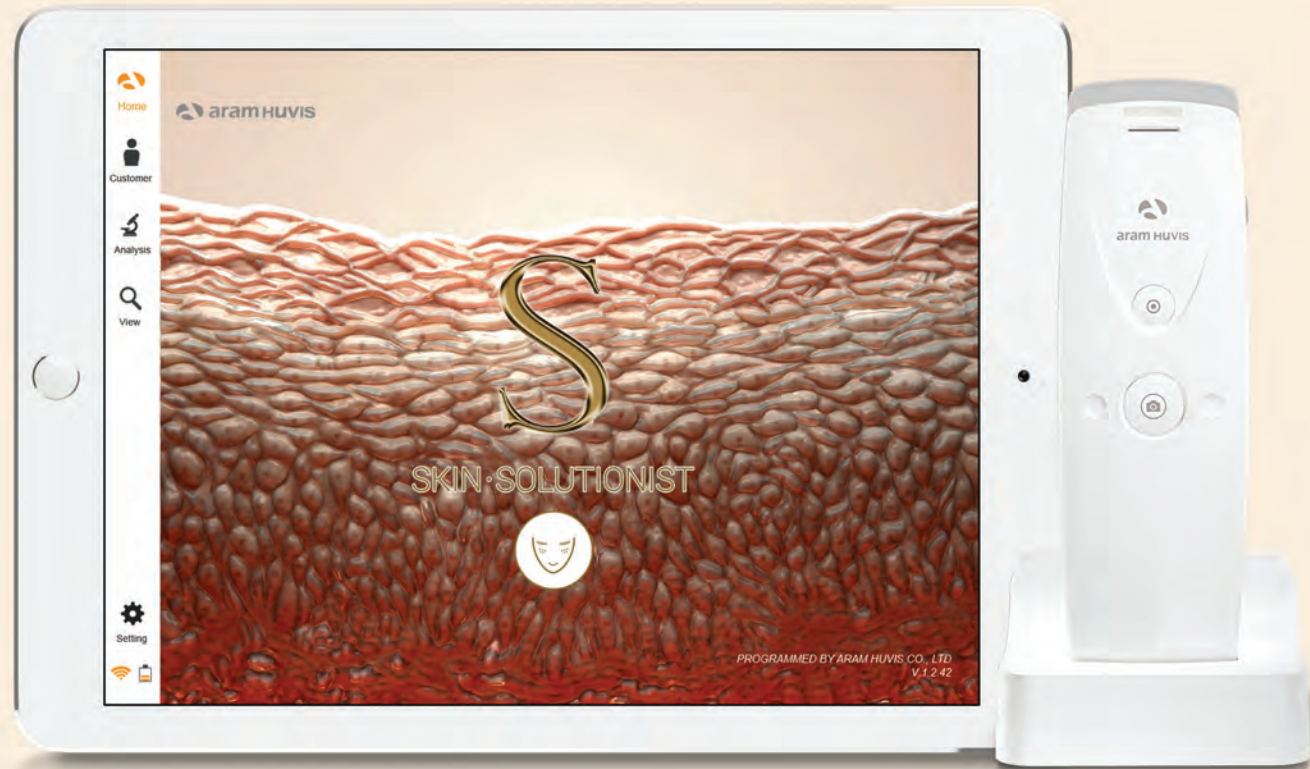

• Set yourself apart

Offering a state-of-the-art service with cutting edge technology gives your business the competitive advantage. Our devices ensure that you are able to provide a higher level of service for your customers and patients, with a more accurate analysis and the most appropriate product recommendation. First time visitors will turn into repeat customers when they return to check the progress of their hair and skin health.

• Expand your services

Pro|Gen Probe hair and skin assessments will result in increased traffic to your salon, spa or clinic; expanding your client base and your number of sales opportunities. Furthermore, the interactive assessment process gathers contact information to share reports with clients, giving you the opportunity to build your database for marketing purposes.

• Client show and tell

Don't tell clients what they need, show them. With Pro|Gen Probe, you will position yourself as the qualified expert on hair, skin and scalp health. Our high-tech hair and skin analyzers allow you to show clients how their analysis compares to the rest of their age group and why your recommendations will improve their overall health.

SKIN

Evaluate skin from within.

Our state-of-the-art skin analyzer allows professionals the ability to more accurately evaluate their client's skin, enabling a more customized care plan and faster treatment results. Healthy skin matters when treating and preventing wrinkles and other common skin issues.

API 100

Aramo Portable scanner Integration

Skin Analysis Device

This impressive wireless device has a smooth and responsive software. The API is also our most user friendly device; it will allow you to input your own product or service recommendations and will display a comparison chart to help you follow the progress of skin health.

ASNII 202

LED

Hair Thickening Brush

Hair Scalp Treatment Device

This Hair Thickening Brush uses LED light and vibrations to help revitalize and promote blood circulation to restore vitality in the hair follicle. Through micro-vibrations, this brush allows product to penetrate deeper into the scalp for better absorption to the hair follicle.

LED Infrared Light therapy is used to promote a healthy scalp by repairing damaged hair and skin cells. It also works to eliminate bacteria and promote circulation of blood in the scalp.

ION

Hair Thickening Brush

Hair Scalp Treatment Device

This Hair Thickening Brush uses Negative Ions and vibrations to help revitalize and promote blood circulation to restore vitality in the hair follicle. Through micro-vibrations, this brush allows product to penetrate deeper into the scalp for better absorption to the hair follicle.

Negative Ions help restore the ionic balance of the hair to tame frizz and smooth strands. In conjunction with micro-vibrations, this Negative Ion comb works to promote scalp circulation and better manageability of the hair.
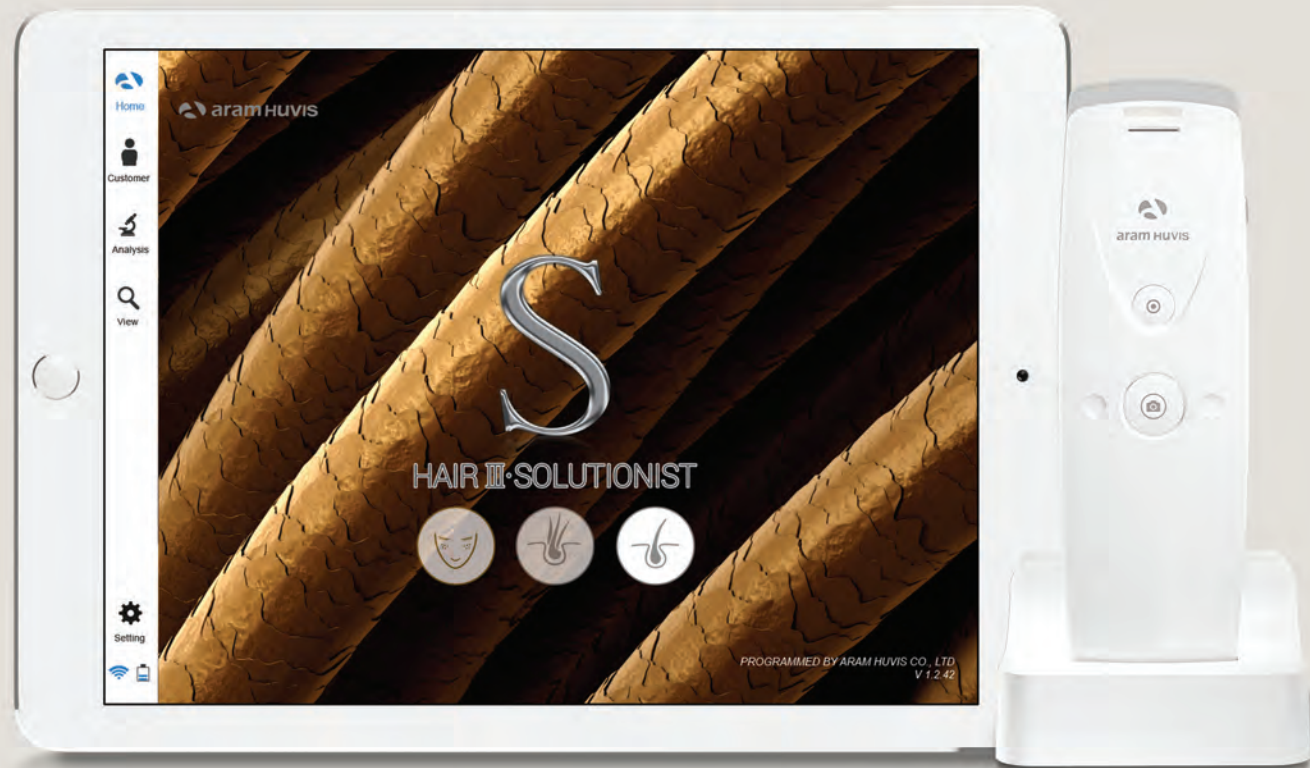

Dream Ray

Ultrasonic Skin Scrubber

Hair Scalp Treatment Device

The Dream Ray Ultrasonic Skin Scrubber uses micro-vibrations to exfoliate and thoroughly clean the skin. This device helps to improve skin elasticity to allow for deeper penetration of products and ingredients.

When used in conjunction with Active Care Scalp Therapy line, helps to exfoliate and purifie the scalp, stimulate the microcirculation, and improve the hair anchorage.

Hair Cuticle

Seeing is believing.

The overall appearance of hair depends largely upon the smooth layering of the cuticle, while the strength depends on the integrity of the cortex.

API 203

Aramo Portable scanner Integration

Hair Cuticle Analysis Device

This impressive wireless device has a smooth and responsive software. The API is also our most user friendly device. It will allow you to input your own product or service recommendations and will display a comparison chart to help you follow the progress of hair cuticle health.
